

BIG BLUE® II

SUPPORT FOR SEXUAL VIGOR*

Roex introduced Big Blue® , a nutritional supplement designed to boost your libido and performance with L-arginine and six libido-enhancing herbs. Big Blue® has really been a boon to couples all over the U.S., and now Roex wants to supercharge your sex life with Big Blue® II! When you combine Big Blue® II with original Big Blue® you are in for an exciting time; namely, heightened sexual desire and ability to perform. Taken in combination or by itself, Big Blue® II will supercharge your sex life.*

The Highest Quality Ingredients

Big Blue® II is a herbal supplement that enhances libido, physical sensation and enjoyment for both men and women. Big Blue® II contains a high potency form of Graminaceae Flower Pollen Extract , which along with *Tribulus terrestris*, increases sexual desire in part by increasing the flow of blood to the sexual organs. As a result, both the desire for intimacy and increased sensitivity lead to greater pleasure for both men and women. For men , it increases blood flow and overall performance. For women, Big Blue® II can support a healthy balance of estrogen and progesterone as well as increase desire. The true benefit of Big Blue® II is that it is scientifically designed to improve overall health and to enhance sexual virility, vitality, and pleasure for both men and women.*

Tribulus terrestris has the common name “puncture vine.” In folk medicine, *Tribulus* has a long history of use in kidney & liver support, as well as helping men and women with their libidos.*

To summarize, in men, *Tribulus* increases serum luteinizing hormone (LH), which in turn leads to an increase in testosterone levels. *Tribulus* has also been shown to significantly enhance sperm health. In women, *Tribulus* increases follicle-stimulating hormone (FSH), which enhances ovulation and supports a healthy Estrogen/Progesterone balance.*

Tribulus contains a combination of compounds called furostanol and protodioscin saponins that appear to be the active components. Other compounds present include glycosides, flavonoids, alkaloids, resins, tannins, sugars, sterols and essential oils.

Graminaceae Flower Pollen Extract

The Graminaceae flower extract that we chose for Big Blue® II is a whole food product that contains vitamins, minerals, proteins, amino acids, phytosterols, enzymes, antioxidants and unsaturated fatty acids. Roex uses only the highest quality nutrient-rich core of flower pollen. As you know, flower pollen extract has long been used in Europe to support healthy prostate gland function.*

Clinical studies have shown that this unique Graminaceae flower pollen extract supports prostate gland health. It improves the body's ability to adapt to stress, which results in enhanced physical and mental capacity. The combination of both ingredients increases physical sensation, energy and blood supply to support and strengthen both male and female reproductive systems.*

In Summary

Supercharge your sex life with Big Blue® II! The combination of *Tribulus terrestris* and Graminaceae Flower Pollen can provide all the benefits of increased libido, sensitivity and pleasure. Big Blue® II can naturally enhance sensation, sex drive, stamina and overall enjoyment. The added benefits of endurance and building lean muscle are probably the result of increased testosterone levels and are just the icing on the cake.*
