

FP-63[®]

Graminaceae Flower Pollen extract

FOR MEN AND WOMEN- A MULTI-FACETED METABOLITE!

WHAT IS FP-63[®] GRAMINACEAE FLOWER POLLEN EXTRACT?

*Roex[®] FP-63[®] Graminaceae Flower Pollen Extract is an allergen-free, flower pollen extract which provides powerful prostate support to men - and urinary function support to both men and women. It is derived from fractions of flower pollen - both water soluble and fat soluble - and consists of alpha amino acids and phytosterols.**

FP-63[®] is multi-faceted. It is much MORE than just a powerful support to the prostate and urinary tract*

Roex[®] FP-63[®] also helps (both men and women):

- boost the libido and potentiate sexual function*
- support healthy cholesterol levels already in normal range*
- protect the liver, gallbladder, stomach and intestines*
- enhance immunity*
- increase energy and stamina/counteract fatigue*
- strengthen and build muscles (especially the muscles of the hands and feet)*
- improve memory*

How can FP-63[®] Graminaceae Flower Pollen Extract specifically help men?

The flower pollen extract assists with prostate health and urinary function for men. The water soluble fractions in flower pollen extract encourage healthy prostate cell metabolism and regulate DHT (dihydrotestosterone) activity. DHT is a male hormone, active in the prostate gland, which is made when the enzyme 5-alpha reductase converts testosterone to dihydrotestosterone. The fat soluble fractions promote proper prostaglandin production, maintain healthy prostate tissue and encourage urinary flow. Both the water and fat soluble fractions support normal urethral smooth muscle relaxation and enhance healthy urinary function.*

Roex[®] FP-63[®] Graminaceae Flower Pollen Extract helps men by:

- Supporting healthy prostate function*
- Encouraging healthy urine flow*
- Impeding the production of DHT*
